DETAILED ACTION

This application is a 371 of PCT/EP2004/051930.Claims 1-12 and newly added claims 13-16 filed Feb. 17, 2006 are pending.

2. Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 6 or 13 when W or R14 contain a terminal heterocyclic substituent, drawn to heterocyclic moiety substituted pyridines classified in class 548 subclass various depending on species election. If this group is elected, a further election of a single disclosed species is also required. Generic claims 1-4, 7-8 reading on the elected compound can be prosecuted together with the election.

Group II, claim, drawn to W, X, Y are selected from optionally nonheterocyclic substituted phenyl, naphthyl, biphenyl, phenyl/naphthyl susbstitued biphenyl classified in class 546 subclass 330+.

Group III, claim 5, drawn to florenyl pyridines. If this group is elected, a further election of a single disclosed species is also required. Generic claims 1-4, 6-8 reading on the elected compound can be prosecuted together with the election.

Group IV, claims 1-4, 6-8 remaining compounds not encompassed by groups I-III. If this group is elected, a further election of a single disclosed species is also required. Further restriction based on the elected species may be required.

Art Unit: 1625

Group V, claims 9-11, drawn to electroluminescent device classified in class 8, subclass 400+. If this group is elected, a further election of a single disclosed electroluminescent device using a single disclosed compound as the electrolumination process is also required.

The inventions are independent or distinct, each from the other because:

The compounds of groups I-IV differ in element, bonding arrangement and chemical properties to such an extend that a reference anticipating one group would not necessarily render another group obvious. The core structure of each group is so diversified that a reference anticipating one group would not necessarily render another group obvious. The search for each group containing different core is not coextensive of each other. In addition, the different core have been evidenced to have different utility for example group II core has been evidenced to have estrogenic activity, the group III core has been evidenced to have the utility of solution phase biological screening.

Inventions I-IV and V are related as products and apparatus for using the product. The inventions are distinct if it can be shown that either: (1) the products as claimed can be made by materially different process, or (2) the apparatus as claimed can be used using another and materially different product. In the instant case, compounds anticipating the claims have been evidenced to have other utility and the device can be made with materially different products such as found in Chiu et al. CA131:58753.

Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above <u>and</u> there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) the inventions have acquired a separate status in the art in view of their different classification;
- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;
- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);

Application/Control Number: 10/568,724 Page 4

Art Unit: 1625

(d) the prior art applicable to one invention would not likely be applicable to another invention;

(e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Celia Chang, Ph. D. whose telephone number is 571-272-0679. The examiner can normally be reached on Monday through Thursday from 8:30 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Janet L. Andres, Ph. D., can be reached on 571-272-0867. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
